# Update Requirements:

macOS 10.10 - 10.13
For: JAM 96k, MiC 96k, or MiC Plus

Check current firmware version

1) Plug JAM or MiC or MiC Plus via USB into Mac computer using USB cable that came in box with Apogee device.

2) Click the icon to open the menu. Hold the <OPTION> key on Apple keyboard and item in menu will change to "System Information". Select this.

3) Navigate to Hardware > USB and in the Device Tree click on the JAM or MiC.

4) Verify the "Version" number is 3.0.2 (MiC Plus Version number is 1.11)

*JAM 96k & MiC 96k: If version is 1.x (like 1.0.5), or 2.x (like 2.02), the device does not need an update.

Perform Update

1) QUIT the System Information app. Keep the JAM/MIC 96k or MiC Plus connected via USB to your Mac.

2) Unzip and open the fwugui.app

3) When app says "Ready to update…" click UPDATE

4) Wait until the programming block reaches 255

5) When the app says firmware is up to date, you can QUIT the updater app.
(Note: MiC Plus firmware will go from version 1.0.11 to 1.0.12)
